ABOUT ME

I'm Rajveer Vikram Khanvilkar, a Computer Engineering student at Pimpri Chinchwad College of Engineering & Research. I'm deeply driven by the idea of turning concepts into real, scalable solutions. My interests span data structures, algorithms, full-stack development, and building real-world web applications that solve practical problems. I'm constantly learning, experimenting, and improving—whether it's through coding projects, system design, or collaborative development. My goal is to engineer technology that is both meaningful and reliable.

PROJECTS

Apka rakshak - World's first Apk scam shield (Kotlin+ MVVM)

World's first app protecting user from apk scams (Launched on playstore and successfully gained **4000+ users and 80+ 5 star reviews**) [Playstore Link](#)

ThugNaash – India's First Offline SMS Scam Link Blocker Android (Kotlin + MVVM + Jetpack Compose)

Developed an offline-first Android security app that detects and strictly blocks scam SMS links in real time using a rule-based detection engine, ensuring user privacy with no internet dependency.

Cyber Security Audit & Vulnerability Scanner – Security + Automation

Built a security scanner that detects weak headers, exposed ports, outdated SSL, and risky endpoints for web/app vulnerability assessment

Smart E-Waste Management System – MERN + Cloud + Gamification

Built a smart IoT-based e-waste solution with blockchain tracking, secure disposal, and reward-based recycling to support sustainability.

PeaceNet App – HTML + CSS + JavaScript + LocalStorage

Developed a responsive social web app with story sharing, user profiles, likes/follows, and LocalStorage-based data persistence.

Green Corridor for Ambulances – Android + Cloud + Maps API

An emergency support app optimizing ambulance routes via cloud-powered traffic monitoring and Maps API integration.

ACHIVEMENTS

Holder of 1 Patent and 3 Copyrights related to software/technology innovations.

Selected as a Zonal Level Finalist in the Avishkar Innovation Competition.

Designed, developed, and successfully deployed 15+ applications, demonstrating strong end-to-end development skills. ([PortFolio Link](#))

Secured 1st rank in INNOVATIONXPO 2026 National Level Project Competition out off 450 teams.

Also Won the Best Unique creative innovation Trophy From Skoda | Volkswagen Pvt. Ltd. Pune

Secured 28th rank out of 800 teams at the national-level innovation competition Innovation 2K25.

Received Certificate of Application Approval from Maharashtra Cyber Security Authority for the innovative cybersecurity application "Apka Rakshak" ([Certificate Link](#))

EDUCATION

Sep 2023 - June 2027

B.E - Computer Engineering
PIMPRI CHINCHWAD COLLEGE OF ENGINEERING AND RESEARCH

CGPA- 8.62/10

HONOURS- CYBERSECURITY

2022 - 2023

New millenium eng. med school
HSC- 69%

2020 - 2021

New millenium eng. med school
SSC- 75%

PATENT & COPYRIGHT

- 1 Patent
- 3 Copyrights

CERTIFICATIONS

- C++
- Python
- Java
- HTML
- Css
- SQL
- Mongodb

TECHNICAL SKILLS

Programming Languages:

Python, Java, SQL, HTML, CSS,
JavaScript , TypeScript

Programming Concepts:

OOP, Data Structures and Algorithms

Libraries & Frameworks:

NumPy, Pandas, TensorFlow,
SpringBoot, WebDriver, React.js, Node.js

Tools & Platforms:

Git, GitHub, Figma ,Canva
